

What is claimed is:

1. A content managing system having a content managing portion comprising:

5 a content library for storing files of a plurality of contents provided by a content provider; library managing means for managing said content library;

10 customer file storing means for storing the file of a content of each user to an area assigned to each user; and

customer file managing means for managing said customer file storing means,

15 wherein said content managing portion and a terminal unit of a user are connected through a network, and

wherein said content managing portion is operated by a terminal unit of a user through the network so that a content linked to a page published by the content provider through the network is copied or linked from said content library to the area assigned 20 to the user.

2. The content managing system as set forth in claim 1,

wherein the contents are advertisements.

25 3. The content managing system as set forth in claim 1,

wherein the content provider can freely

change, replace, and delete the file of a content provided to said content library.

4. The content managing system as set forth in claim 1,

5 wherein said content managing portion counts the number of users who copied or linked the contents to their user areas and creates a database containing the counted values.

5. The content managing system as set forth in 10 claim 1,

wherein said content managing portion counts the number of male users and the number of female users who copied their contents to their user areas and creates a database containing the counted values.

15 6. The content managing system as set forth in claim 1,

wherein said content managing portion counts the number of users in each age group who copied their contents to their user areas and creates a database 20 containing the counted values.

7. The content managing system as set forth in claim 1,

wherein said content managing portion counts the number of clicks of each content copied or linked 25 to each user area and creates a database containing the counted values.

8. The content managing system as set forth in

claim 1,

wherein said content managing portion counts  
the clicked date and time of each content copied or  
linked to each user area and creates a database  
containing the counted values.

5

9. The content managing system as set forth in  
claim 1,

wherein said content managing portion counts  
the period for which each content was stored or linked  
10 in each user area and creates a database containing the  
counted values.

10

10. A content managing apparatus, comprising:

a content managing portion having:  
a content library for storing files of a  
plurality of contents provided by a content provider,  
library managing means for managing said  
content library,

15

customer file storing means for storing the  
file of a content of each user to an area assigned to  
20 each user, and

20

customer file managing means for managing  
said customer file storing means;

and

25

communicating means for connecting the  
content managing apparatus to a network,

wherein a terminal unit of a user is operated  
through the network so that a content linked to a page

published by the content provider through the network is copied from said content library to the area assigned to the user.

11. The content managing apparatus as set forth  
5 in claim 10,

wherein the contents are advertisements.

12. The content managing apparatus as set forth  
in claim 10,

10 wherein the content provider can freely change, replace, and delete the file of a content provided to said content library.

13. The content managing apparatus as set forth  
in claim 10,

15 wherein the number of users who copied or linked the contents to their user areas is counted and a database containing the counted values is created.

14. The content managing apparatus as set forth  
in claim 10,

20 wherein the number of male users and the number of female users who copied their contents to their user areas is counted and a database containing the counted values is created.

15. The content managing apparatus as set forth  
in claim 10,

25 wherein the number of users in each age group who copied or linked their contents to their user areas is counted and a database containing the counted values

is created.

16. The content managing apparatus as set forth  
in claim 10,

5 wherein the number of clicks of each content  
copied or linked to each user area is counted and a  
database containing the counted values is created.

17. The content managing apparatus as set forth  
in claim 10,

10 wherein the clicked date and time of each  
content copied or linked to each user area is counted  
and a database containing the counted values is  
created.

15 18. The content managing apparatus as set forth  
in claim 10,

wherein the period for which each content was  
stored in each user area is counted and a database  
containing the counted values is created.

19. A content managing method, comprising the  
steps of:

20 providing a library for storing the files of  
a plurality of contents provided by a content provider;

providing a content managing portion for  
assigning a user area for storing the file of a content  
of each user to a customer file storage;

25 connecting the content managing portion and a  
terminal unit of a user through a network, and  
operating the content managing portion by a

terminal unit of a user through the network so that a content linked to a page published by the content provider through the network is copied or linked from the library to a user area.

5 20. The content managing method as set forth in claim 19,

wherein the contents are advertisements.

21. The content managing method as set forth in claim 19,

10 wherein the content provider can freely change, replace, and delete the file of a content provided to the library.

22. The content managing method as set forth in claim 19,

15 wherein the content managing portion counts the number of users who copied or linked the contents to their user areas and creates a database containing the counted values.

20 23. The content managing method as set forth in claim 19,

wherein the content managing portion counts the number of male users and the number of female users who copied or linked their contents to their user areas and creates a database containing the counted values.

25 24. The content managing method as set forth in claim 19,

wherein the content managing portion counts

the number of users in each age group who copied or linked their contents to their user areas and creates a database containing the counted values.

25. The content managing method as set forth in  
5 claim 19,

wherein the content managing portion counts the number of clicks of each content copied or linked to each user area and creates a database containing the counted values.

10 26. The content managing method as set forth in  
claim 19,

wherein the content managing portion counts the clicked date and time of each content copied or linked to each user area and creates a database containing the counted values.

15 27. The content managing method as set forth in  
claim 19,

wherein the content managing portion counts the period for which each content was stored or linked in each user area and creates a database containing the counted values.
